

The propaganda machine at Sinclair Broadcasting has decided to air an anti-Kerry documentary just days before the election. This media manipulation by these corporate extremists is an example why the media in all its varied forms has to stay and become even more 'deversified'! Putting too much information into the hands of only a few people will give us nothing but slanted pap.

The United States has been built under the umbrella of democracy. Too many corporations feel no responsibility to the concept of democracy or to the United States, their country of origin. Their wealth shouldn't give them special status but it does too often. That's why we need people at the FCC who have the backbone to uphold the Constitution and the concept of a free democracy.

Sinclair's actions show why we need to strengthen media ownership rules, not weaken them. They show why the license renewal process needs to involve more than a returned postcard. Thank you.
